

iMRS for Professionals

<http://imrs.sg>

iMRS Professional comes complete with full-body mat, pad and probe as applicators and is equipped with bio-feedback (iMORE) & Audio-Visual Entrainment system (iSLRS). The professional package also comes with iGUIDE, a virtual catalog of preset programming for health practitioners.

iMRS is FDA registered and certified by Health Canada as Medical device, and is suitable for clinical use.

iMRS for Home

<http://omnium1.sg>

iMRSone Omnium1 is the latest addition to the iMRS family, designed for home use as a lifestyle health companion.

It is also the world's first Android tablet based portable PEMF device, based on the same proven technology used in iMRS professional.

Omnium1 is a modular system and can be upgraded anytime. Prevention, active health, wellness and fitness management in the comfort of your home is no longer a vision.

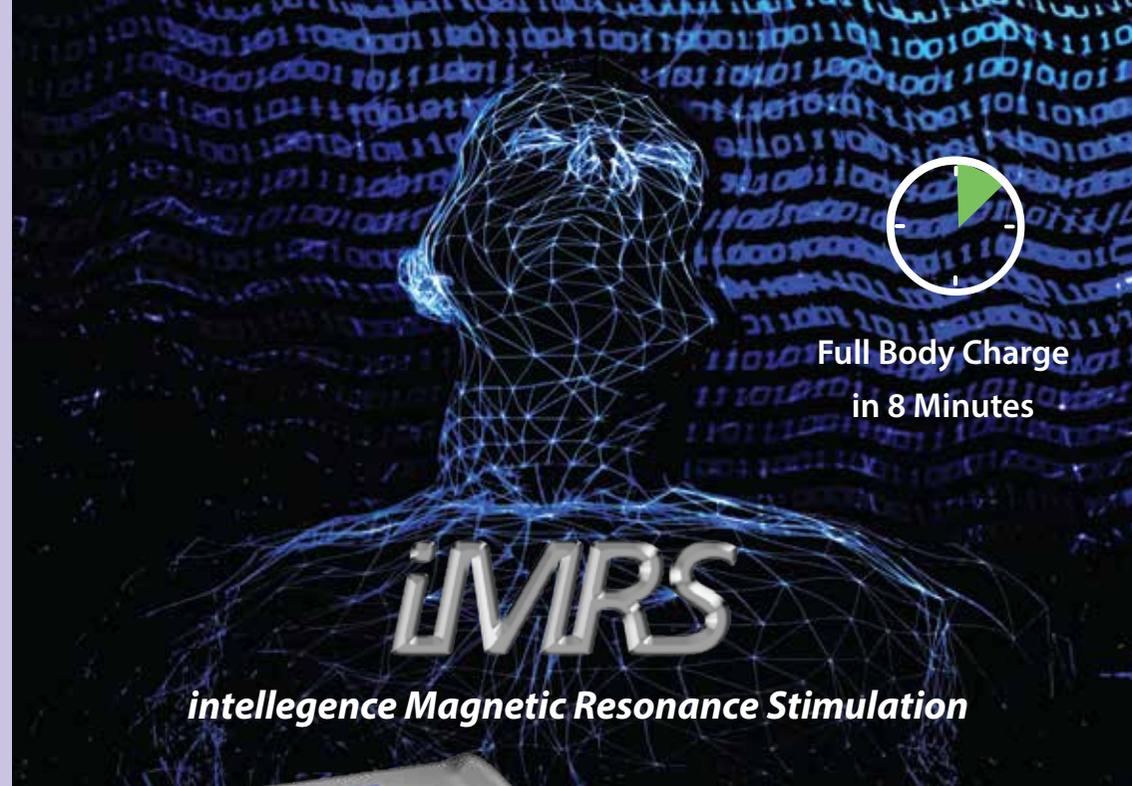

iMRS Advantages

- German Technology . Swiss Quality & Design
- World's Best Selling Home-based PEMF system
- Build on the foundation of ~20 years of PEMF experience
- Intelligent Biological Clock system
- Based on Earth's Natural EMF & body frequencies

intelligence Magnetic Resonance Stimulation

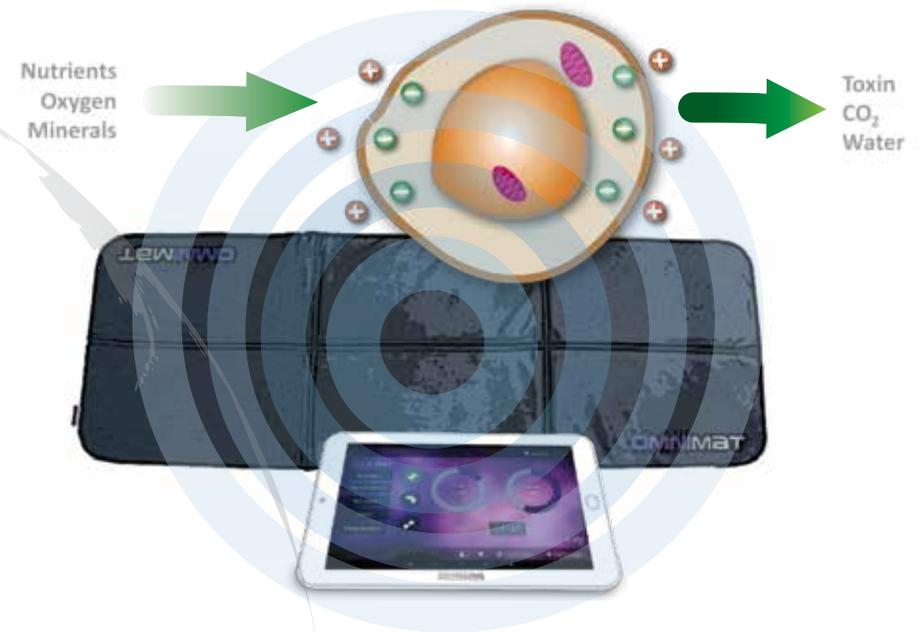

Possible Benefits of Pulsed Magnetic Field Therapy

- Increased Blood Circulation
- Enhanced Muscle Function
- Decreased Inflammation
- Stress Reduction
- Bone Healing
- Blood oxygenation
- Improved Metabolism and detoxification

Pulsed Electromagnetic Field Therapy (PEMF)

Our Earth has a magnetic field that fluctuates (pulses) and this pulsed electromagnetic field (PEMF) is a key component for life. Each of the approximately 75 trillion cells in your body vibrates or oscillates. Using the appropriate frequencies, electromagnetic impulses can induce resonant vibrations to stimulate a variety of cellular functions. However, only specific range or spectrum of electromagnetic frequencies are readily accepted by the body (called the biological window) trigger physiological responses. One key function of the cell membrane is to regulate the environment for biological processes inside the cell. This is achieved through selectively allowing water, nutrients, and elements to enter or leave the interior of the cell. One way the cell membrane achieves selective "permeability" is through the establishment of a membrane potential. PEMF normalizes cell membrane potentials.

PEMF therapy is similar to charging a battery, which is each and every one of your cells. PEMF stimulates atoms, increases electronic spin, aligns molecules, and generates very small microcurrents that tend to run along nerve pathways. This leads to an increase in intercellular communication, metabolic processes in part due to increased circulation, oxygenation, alkalization, ATP production (the form of energy used by cells to perform work such as running enzymes), and optimized cell membrane potential. As a result, cells regenerate, oxidative stress and inflammation is reduced, immune responses are more robust, the feel-good endorphins are boosted, depleted adrenal and other endocrine gland functions are restored. Healing, rejuvenation, and regeneration. This is the foundation of PEMF therapy.

In every area of life, any one can benefit from the power of pulsating electromagnetic field

For your worklife & learning

to maximize your mental clarity, focus and productivity
for efficient 8-24 minute work breaks, providing essential renewal in the midst of your projects, requiring heavy concentration
for healthy on-the-job stress management

For general well-being

to improve circulation and immune system function
to activate cellular metabolism and repair
to aid relaxation and detoxification
to provide optimal overall vitality

For Athletes & the active lifestyle

for pre-competition warm-up
to reduce or eliminate lost training days due to illness
for rapid post-exercise recovery after strenuous workouts
to support faster rehabilitation for injuries

For the elderly & the less active

to improve mobility
to increase energy, vitality and strength
to provide metabolic support for bed-bound people
to optimize physical and psychological balance
